The all new Quest sail is designed to make your first windsurfing experience as fun and easy as possible. With its light weight handling and smooth power delivery it is the perfect sail for both beginners, youth sailors and / or as a sup sail. The smaller sizes feature a dacron and PVC panel layout and the larger sizes (from 3.5 and upwards) feature a dacron and monofilm constuction. The Quest sail is very durable for the wear n' tear seen at windsurfing schools and centers. All rig components are designed for the maximum ease of use and durability.

It is sold as a package for simplicity and compatibility.

QUEST BOOM

The Quest rig package includes a fixed length aluminum boom, customized for each sail size. By minimizing the design features the Quest boom offers the best possible price, durability and ease of use.

QUEST MAST

A fibreglass mast specifically designed for dacron sails with less mast curve.

Sizes: 220 / 250 / 280 / 310 / 340 / 370 / 400 / 430

MAKANA WINDSURFER

The 11'2" x 36" is a beginner and school windsurfing board. It is extremely stable due to a generous width, outline and volume. It has superb tracking thanks to the center fin and is equipped extra handles to make carrying it easier. Learning to windsurf has never been more fun and easier!

FEATURES

- Superb glide and tracking
- Square tail for quick turning
- 3 mm diamond EVA deck pad
- Dyneema stringer on top and bottom

length width thickness volume
11'2" / 323cm 36" / 91cm 6" / 15cm 320 L

CARBON PADDLE \$414

A pure performance paddle, no compromise, all power, supreme stiffness, minimal weight. A well balanced blade design with a medium dihedral providing great stability and good power.

Shaft 100% K3 Pre preg Carbon / oval grip profile
Blade 100 % K3 Pre preg Carbon / 8.2 inch

ADJUSTABLE HYBRID PADDLE \$276

The perfect paddle for riders looking for a lightweight, carbon/glass fusion blade and shaft for racing, wave riding and all-around cruising performance.

Shaft 50 % K3 Pre preg Carbon / round grip profile
Blade 50 % K3 Pre preg Carbon / 8.1 inch

ALU PADDLE \$103

For top quality and value for money. Featuring a solid aluminium shaft with a flexible, yet highly durable plastic blade. It will withstand the daily hits from the unavoidable learning curve. An adjustable range of 170 - 210 cm gives everyone, no matter what size, a chance to have a go.

Shaft Aluminium / round grip profile / 2 or 3 pcs
Blade Durable plastic / 8.1 inch

COILED SUP LEASH \$47

For comfort and functionality while keeping you and your board safely connected.

SINGLE LAYER DROP STITCH - 15-20% LIGHTER

The Simmer Makana inflatable paddle boards are manufactured with super-strong high-density single layer drop stitch material. The rails are reinforced with a double PVC wall and top and bottom deck is strengthened by a Dynema stringer. This provides a strong, durable and extremely stiff construction.

The outer layers of coated PVC are connected by thousands of thin but strong internal threads which allow the board to hold the shape when inflated to high pressure (up to 15 psi).

The double wall rails give the board a unique stiffness, it also eliminates the risk of puncture or material failure. This allows you to use the board with total confidence.

WINDSUP

The 10', 10'6" and 11'2" are fitted with a windsurf base which allows you to use any standard windsurf sail up to 6.0 m2 on your Makana board. Easy to learn on and fun to use no matter if you are a beginner or avid wave sailor!
